All numbers in the chart are represented in MCFG.

Equation:

Price per Barrel of Oil / Price per MCFG = MCFG equivalent to 1 barrel of oil

\$50 Per Barrel of Oil / \$8.00 Per MCFG = 6.250 MCFG

Explanation:

This chart shows the amount of gas that would have to be produced to equal 1 barrel of oil at various oil and gas prices. It serves as a simple conversion guide only. Numerous other variables will effect the actual mathematical ratios for such conversions.
